Forest Tenures

Table 2: Active Forest Tenure Harvesting Authority within the M-KMA

The harvesting authority is a legal area cleared by the Ministry of Forests (that is, no other claims for the land exist) for harvesting purposes. The layer contains harvesting authority boundaries for the following feature classes: Christmas Tree Permit, Forest Licence Cutting Permit, Licence to Cut, Timber Licence Cutting Permit, Timber Sale Licence Major Cutting Permit, Timber Sale Licence Minor, Tree Farm Licence Cutting Permit, WoodLot Licence Cutting Permit, Timber Sale Licence Minor Cutting Permit, and Community Forest Cutting Permit. Each harvesting authority has a life cycle status code that is either PENDING - the harvesting authority has been submitted as a new harvesting authority or an amendment, but is not yet approved or rejected, ACTIVE - the harvesting authority is approved and activities may be taking place on the harvesting authority, or RETIRED - all activities have been completed for the harvesting authority. Table 2 represents a summary of active harvesting authority polygons within the M-KMA.

Tenure Status	Tenure Type	Number of Tenures	Area within M-KMA (ha)
Issued	Occupant Licence to Cut	11	625.4

Occupant licences to cut are issued for the cutting, or cutting and removal, of Crown timber from Crown land or private land. In all cases, the applicant must hold a right to occupy and use the land being harvested through a "right of occupation", a lease, or a special use permit.

Table 3: Active Special Use Permits within the M-KMA

A special use permit (SUP) gives non-exclusive authority to a company or an individual to occupy and use an area of Crown land within the Provincial Forest.

<i>Tenure Status</i>	<i>Tenure Type</i>	<i>Number of Tenures</i>	<i>Area within M-KMA (ha)</i>
Issued	Wildlife Habitat Enhancement	1	939.3

Wildlife habitat enhancement treatments including associated facilities and camps (includes restoration if related to wildlife habitat). The SUP issued in the M-KMA is for the restoration of seismic lines.

Table 4: Active Managed Licences within the M-KMA

Managed licences are area-based tenures that include Community Forest Agreements, First Nations Woodland Licence, and Woodlots. Table 4 represents the extent of the area-based tenure boundary within the M-KMA. There was no individual harvest authorities reported within the area-based tenure in 2024.

<i>Licence ID</i>	<i>Client Name</i>	<i>Issue Date</i>	<i>Area within M-KMA (ha)</i>
N2T A Schedule B	Obo Forest Management GP Ltd.	2019-12-10	68,169.2

Table 5: Range Tenures within the M-KMA

Range Tenures (grazing and hay cutting licence and permits) are areas of Crown rangeland where a Range Act tenure applies. Tenure holders access a defined amount of forage through grazing (measured in Animal Unit Months) or hay (tonnage).

<i>Tenure Status</i>	<i>Number of Tenures</i>	<i>Area within M-KMA (ha)</i>
Pending	3	113,879.1
Active	36	6,013,953.5

Many of the Range Tenures in the M-KMA overlap each other. While the individual sum of the 36 active tenures is 6,013,953.5 ha, the combined area footprint of all the active tenures covers 5,418,427.5 ha (85% of the management area).

Table 6: Active Road Permits within the M-KMA

A road permit provides cutting authority for the timber within the road right of way. If the road is an existing non-status road (an older, abandoned road with no active tenure), a road permit is required for industrial use and maintenance.

<i>Road Section</i>	<i>File Type</i>	<i>Client Name</i>	<i>Issue Date</i>	<i>Length within M-KMA (km)</i>

Mineral Tenures

Table 7: Mineral Tenures within the M-KMA

Mineral tenures contain sub-surface title data for: mineral claims, mining leases, placer claims, placer leases, coal license applications, coal licenses, and coal leases.

<i>Tenure Type</i>	<i>Issue Date</i>	<i>Number of Tenures</i>	<i>Area within M-KMA (ha)</i>

Water Tenures

Table 8: Summary of Active Water Tenures within the M-KMA

Ground Water Wells show the location of drilled, dug, or driven wells in the province.

Water Approval Points are where an approval has been requested to conduct works in the vicinity of a water source. Water Approvals are issued for either short term use of water or for changes in and about a stream, depending on the type of proposed works.

Water Rights Licences include data for both surface water and groundwater points of diversions. Point of diversion types include surface water points of diversion, groundwater points of well diversion, points of groundwater diversion, and non-well groundwater diversion points such as dugouts, ditches and quarries.

<i>Tenure Type</i>	<i>Number of Tenures</i>
Ground Water Wells	53
Water Approvals Points	30
Water Rights Licences	43

Traplines and Guide Outfitter Areas

There are 68 Traplines within the M-KMA that cover 99% of the management area, while 30 Guide Outfitter Areas cover its entirety.
